How To: Access your email through a web browser
1) Open your web browser and enter ‘webmail.’ followed by your domain name in the address bar. Eg: http://webmail.yourdomainname.com/

2) Enter your ‘User name:’ If your email address was youremail@yourdomain.com your User name would be ‘youremail’ (we ignore the ‘@yourdomain.com’)

3) Enter your password

4) Click “Login” or “OK”

5) If this is your first time logging in, the system may ask you to enter some personal details so it can set your email up correctly.
6) You can now send, receive and view emails from your web browser just like Hotmail, Yahoo! or any other web based mail client!
